EDUCATION

University of Engineering and Technology, VNU Hanoi 2022 – 2026

B.Sc. in Computer Science (Artificial Intelligence track) GPA 3.2/4.0

Relevant coursework: Machine Learning, Deep Learning, Computer Vision, Probability and Statistics, Data Structures and Algorithms.

EXPERIENCE

AI Intern, Hai Au Vision Lab Jan 2026 – Jun 2026

- Labelled images and trained YOLO models for a retail shelf-counting demo.
- Wrote Python scripts to clean datasets and export training reports.
- Supported a senior engineer in comparing model accuracy across three cameras.

PROJECTS

Graduation Thesis: Plant Leaf Disease Classification 2026

- Trained a ResNet-18 classifier in PyTorch on a public leaf dataset and reached 91% test accuracy.

Movie Recommendation Web App 2025

- Team project of three people: collaborative filtering in scikit-learn with a simple Flask interface.

Chatbot Course Assignment 2025

- Called a hosted LLM API from a small Streamlit app that answers questions about course notes.

SKILLS

Programming: Python, basic Java. **Libraries:** PyTorch, scikit-learn, OpenCV, Pandas. **Tools:** Git, Google Colab, Linux basics.

ACTIVITIES

- Member of the university AI Club; helped organise a student Kaggle study group.

LANGUAGES

Vietnamese (native), English (TOEIC 650).
