Mai Duc Thinh

Conversational AI Test Lead
Hanoi, Vietnam | +84 90 000 2028 | thinh.mai@example.com

About Me

QA engineer with 7 years of experience, the last 4 focused on voice assistants and LLM agents. I own test strategy for multi-turn dialogue and trace failing conversations across every hop of the voice pipeline.

Experience

Conversational AI QA Lead Jul 2022 – Present

Echo Voice Systems, Hanoi

- Own the English and Vietnamese test strategy for a voice assistant in smart speakers and service robots.
- Built a pytest harness that replays 50,000 synthesized and recorded utterances against cloud and device builds.
- Built OpenTelemetry and Langfuse tracing so every turn can be rebuilt across ASR, NLU, LLM, tools and TTS.
- Defined go/no-go release gates and evaluation sets with LLM-as-a-judge and human review.

Senior QA Engineer Jun 2019 – Jun 2022

Northwind Chat Solutions, Hanoi

- Automated regression tests for banking chatbots with Robot Framework.
- Introduced intent coverage reports and reduced dialogue defects found after release by half.

Tools & Methods

Conversation QA: Test taxonomy, slot filling, context retention, barge-in, disambiguation, code-switching
Evaluation: WER/CER, MOS, task success rate, groundedness, faithfulness, hallucination rate, LLM-as-a-judge
Automation: Python, pytest, Robot Framework, custom ASR-LLM-TTS harnesses
Observability: OpenTelemetry, Langfuse, LangSmith, Datadog, ELK

Education

B.Eng. in Software Engineering, Hanoi University of Science and Technology, 2015 – 2019

Languages

Vietnamese (native), English (fluent, IELTS 7.5)
