Trinh Bich Ngoc

AI Test Engineer
Hanoi, Vietnam | +84 90 000 2056 | ngoc.trinh@example.com

Software test engineer with 3 years of experience, including 18 months testing LLM and machine learning features. Detail-oriented, with a solid grounding in SDLC, STLC and automated testing.

Experience Highlights

AI QA Engineer May 2025 – Present
Bright Assist AI, Hanoi

- Create test plans and test data for a RAG customer assistant from requirements documents.
- Evaluate outputs with DeepEval and RAGAS, and track hallucination and bias findings.
- Run prompt-injection and safety test sets before every model update.

Software Tester Sep 2023 – Apr 2025
Tan Long Software, Hanoi

- Tested web applications and REST APIs manually and with Playwright.
- Validated data with SQL and logged defects in Jira.

Certifications

- ISTQB Certified Tester Foundation Level
- ISTQB AI Testing (CT-AI)

Strengths

Testing: Test plans, test cases, smoke, sanity, regression and system testing, API and performance testing
AI testing: Model evaluation, hallucination detection, bias and fairness, prompt testing, DeepEval, RAGAS
Automation: Python, pytest, Playwright, Postman, JMeter
Data and tools: SQL, data testing, OWASP Top 10 basics, Jira

Education

B.Eng. in Information Technology, Thuyloi University, 2019 – 2023

Languages

Vietnamese (native), English (good, TOEIC 780)
