Pham Duc Anh

DevSecOps Engineer

DevOps engineer with 5.5 years of hands-on platform work, including sole responsibility for a production AWS environment. I build delivery pipelines where security checks run by default, then work with development teams and security operations to close the findings.

Work Experience

DevSecOps Engineer

Jan 2023 – Present

Kiwi Cloud Fintech, Hanoi

- Own AWS infrastructure for dev, test and production across 3 accounts using Terraform, EKS and Helm, serving 40 microservices.
- Built GitOps delivery with GitLab CI and Argo CD, including SAST, DAST, dependency, container and SBOM checks that gate every release.
- Manage secrets, IAM least privilege, network policies and CIS baselines; passed an external penetration test with no open high-severity findings.
- Run HA PostgreSQL, Redis and Kafka, with quarterly backup restore and failover drills.
- Operate an internal LLM gateway with per-user quotas, cost dashboards and a Qdrant vector store with backups.

DevOps Engineer

May 2021 – Dec 2022

MekongSoft Outsourcing, Ho Chi Minh City

- Migrated Jenkins pipelines to GitHub Actions and containerised 15 Java and Node.js services.
- Deployed Prometheus, Grafana and ELK; wrote Python and Bash tools that automated routine operations.
- Acted as on-call lead for incidents and wrote post-mortems shared with clients.

Measured Impact

Area	Before	After
Deployment lead time	2 days	25 minutes
Critical CVE remediation	30 days	6 days
Monthly AWS cost	$41,000	$29,500
Failover time (RTO)	1 hour	9 minutes

Security Remediation

Worked through monthly findings from the bank partner's security operations center: triaged by severity, fixed configuration issues directly, assigned code issues to engineers and tracked closure within agreed deadlines.

CLOUD & CONTAINERS

AWS | EKS | Docker | Kubernetes | Helm | Terraform | Ansible

CI/CD & GITOPS

GitLab CI | GitHub Actions | Jenkins | Argo CD

SECURITY

SonarQube | OWASP ZAP | Trivy | Syft | Vault | CIS Benchmarks | OWASP Top 10

OBSERVABILITY

Prometheus | Grafana | ELK | OpenTelemetry

DATA & AI PLATFORM

PostgreSQL | Redis | Kafka | Qdrant | LiteLLM

SCRIPTING

Python | Bash

CERTIFICATIONS

AWS Solutions Architect – Associate
Certified Kubernetes Administrator
CompTIA Security+

EDUCATION

B.Sc. Information Security
Academy of Cryptography Techniques, 2017 – 2021
