Truong Quang Huy

Full Stack Developer

Ho Chi Minh City, Vietnam | +84 90 000 2007 | huy.truong@example.com

PROFESSIONAL SUMMARY

Full stack developer with 4 years of experience shipping web and mobile products end to end. I work across Python backends and React or Flutter clients, and I have recently moved into AI-assisted features.

CORE SKILLS

Backend: Python, FastAPI, Django, PostgreSQL, Redis, Celery
Frontend and mobile: ReactJS, TypeScript, Flutter, Dart
AI: OpenAI API, LangChain, prompt engineering, Cursor
Delivery: Docker, GitHub Actions, AWS, Git

EXPERIENCE

Full Stack Developer Feb 2024 – Present

Nimbus Lab Instruments, Ho Chi Minh City

- Build a Python and FastAPI backend with a ReactJS dashboard for monitoring laboratory test equipment.
- Shipped a Flutter companion app used by 900 engineers for alerts and remote test status.
- Added an LLM assistant that summarises test logs and answers questions over documentation.
- Own features from API design through release and production support.

Software Developer Aug 2022 – Jan 2024

Pixel Harbor Studio, Ho Chi Minh City

- Developed Django REST APIs and React front ends for retail clients.
- Wrote unit and integration tests and reduced production bugs by about 30%.

PROJECTS

- Battery Cycle Viewer: open-source Flutter app that charts charge and discharge data from CSV exports.

EDUCATION

B.Eng. in Computer Science, Ho Chi Minh City University of Technology, 2018 – 2022

LANGUAGES

Vietnamese (native), English (professional, TOEIC 850)
