Tang Gia Han

Senior AI Engineer
Hanoi, Vietnam | +84 90 000 2091 | han.tang@example.com

SKILLS AT A GLANCE

Languages: Python, Go, Node.js
Backend: FastAPI, SQLAlchemy, PostgreSQL, Redis, Celery, WebSocket, microservices
AI: PyTorch, LangChain, RAG, embeddings, model deployment
Fundamentals: Machine learning, data structures, testing, technical documentation

OBJECTIVE

Backend engineer turned AI engineer with 6 years of professional experience. I build Python and Go services around machine learning models and explain technical trade-offs clearly to non-technical stakeholders.

EMPLOYMENT

Senior AI Engineer Jan 2024 – Present

Quanta Learning AI, Hanoi

- Build FastAPI, Celery and WebSocket services for a real-time AI study assistant.
- Own RAG APIs over PostgreSQL and Redis serving 15,000 daily users.
- Turn ambiguous requests from academic teams into scoped technical plans with clear risks.

Backend Engineer Jul 2020 – Dec 2023

Delta Fulfilment Tech, Hanoi

- Developed Go and Python microservices for order routing at 300 requests per second.
- Trained a PyTorch demand-forecasting model and deployed it behind an internal API.
- Maintained tested and documented services and reduced incidents by 35%.

COMPETITIONS

- Top 5%, AI Challenge HCMC, 2023

EDUCATION

B.Eng. in Computer Science, Hanoi University of Science and Technology, 2016 – 2020

LANGUAGES

Vietnamese (native), English (professional, IELTS 7.0)
