Nguyen Thu Ha

Senior Business Analyst · Hanoi, Vietnam · +84 90 000 4404 · ha.nguyen@example.com

About Me

Technical Business Analyst with 5 years of experience, more than 3 of them on systems that join hardware, software and AI. I sit between customers and engineering, keep one requirement baseline for development, QC and deployment, and I am comfortable pushing back on unclear requirements.

Key Achievements

320+
user stories delivered with Given-When-Then criteria

100%
requirement-to-test traceability on two releases

45%
fewer change requests after onsite discovery

Experience

Senior Technical Business Analyst Apr 2023 – Present

RoboCore Automation JSC — warehouse and service robots, Hanoi

- Elicit requirements with customers and the Product Owner for autonomous service robots deployed at 12 sites; map current and target workflows and record assumptions, constraints and limitations.
- Specify APIs, data flows, state transitions, error handling and fallback for edge cases such as network loss, sensor failure and incorrect AI responses.
- Define evaluation criteria for voice-assistant features with Tech Leads, covering intent accuracy, latency and behaviour boundaries.
- Join backlog refinement, sprint planning, stand-ups and reviews with 3 Scrum teams, and review test cases with QC.
- Support UAT, commissioning and onsite testing; classify field feedback into defects, requirement gaps, AI limitations and deployment issues.
- Read ROS 2 logs and write SQL queries to verify behaviour before raising defects.

Business Analyst Aug 2021 – Mar 2023

GreenGrid IoT Solutions — smart building platform, Hanoi

- Wrote use cases, UML sequence diagrams and BPMN flows for a cloud platform that connects 8,000 energy sensors.
- Maintained requirement baselines and managed change impact on scope and timeline with the PMO.

Tools & Methods

- Jira, Confluence, Figma, Draw.io, Postman
- BPMN, UML, state and sequence diagrams
- SQL, log analysis, Grafana dashboards
- Scrum, Given-When-Then, MoSCoW
- ROS 2 concepts, LLM and conversational AI basics
